5.0 RISK INDICATORS

- 5.1 The Report (**pages 10 and 11**) includes three long-term risk indicators.
- 5.2 The Fund's annualised **Standard Deviation**, which is a reflection of volatility, was 7.8% for the rolling three year period to September 2015, 0.9% above the benchmark.

- 5.3 The **Sharpe Ratio** is a measure of how well the return compensates an investor relative to the risk taken. A higher Sharpe Ratio reflects a better return for a given level of risk or lower risk for a given level of return. The ratio for the Fund for the rolling three year period to September 2015 is +0.2% above the benchmark.
- 5.4 The **Tracking Error** figure reflects how closely a fund manager's actual return follows their respective benchmark. As at September 2015 the figure was 2.1%.
- 5.5 The **Information Ratio** is a measure of excess returns in relation to the benchmark and the consistency of those returns. A high IR could be derived from a high portfolio return, a low benchmark return and a low tracking error. For the period up to September 2015 the ratio for the Fund was +1.2%.

6.0 SOLVENCY

- 6.1 The **solvency position** is presented in **Appendices 3 and 4**. As at 30 September 2015 the estimated solvency was 73%. This represents a 5% reduction to the solvency figure as at 31 March 2015 and is unchanged from the 2013 Actuarial Valuation figure.
- 6.2 Since the 2013 Actuarial Valuation asset outperformance has elevated the funding level by 6%, with higher than anticipated contribution income and modest actual pension increases adding a further 3%. This has been mitigated by financial assumptions – substantially falling gilt yields which have increased liability valuations – adversely impacting the funding ratio by 9%.
- 6.3 The deficit had substantially increased in cash terms from £668m as at 31 March 2013 to £857m at 30 September 2015. This is driven by a 0.5% reduction in gilt yields since March 2013 acting to increase the value of liabilities.

7.0 REBALANCING

- 7.1 At the PFC meeting on 9 July 2015 Members agreed to rebalance the investments with Amundi and M&G so that these managers, both of which operate to a liability matching benchmark, manage a similar value the Fund's assets. £40m was transferred from Amundi to M&G (£35m) and cash (£5m) on 9 September 2015. The transfer to cash was required to address the requirements following the advance payment of deficit contributions by some of the Fund's employers.
- 7.2 The decision was subsequently taken to entirely disinvest from Amundi, resulting in disposals and cash transfers totalling £85m. Transfers were made to Baillie Gifford (£50m), Standard Life GARS (£32m) and cash (£3m) on 28 October 2015. A further in specie transfer of all residual assets took place between Amundi and M&G on 9 November 2015. See **Appendix 5** for the Rebalancing Schedule.

8.0 **PROXY VOTING**

- 8.1 The report from PIRC is available on request summarising the proxy voting activity in the period July 2015 to September 2015. This report covers the votes cast on behalf of NYPF at all relevant company AGMs in the period and includes an analysis of voting recommendations at selected meetings and responses to company engagement.

9.0 **RECOMMENDATION**

- 9.1 Members are asked to note the investment performance of the Fund for the Quarter ending 30 September 2015.
